Scope of Supply (scope statement must be verified and appear in the space below)					
<u>Head Office:</u> Provision of Training, Assessment and Competence Achievement Based on STCW 1978, as Amended and other Training Programs including Design and Marine Survey and Certification <u>Bacoor Site:</u> Provision of Training, Assessment, and Competence Achievement based on Training Programs including Design and Marine Survey and Certification					
Accreditation	UKAS				
No. of Certs required	0				
Languages	English				
Reason for Issue of Certificate	N/A – Surveillance Only				
Further Instructions (additional certificate instruction or information for the office) :					
All services offered under UKAS accreditation are performed under the management control of Bureau Veritas Certification Holding SAS – UK Branch No changes in the organization (scope, number of employees, sites, management, organization).					

Audit Summary

1. Audit Objectives

The objectives of this audit are :
Surveillance 2:

1. to confirm that the management system conforms with all the requirements of the audit standard;
2. to confirm that the organization has effectively implemented its planned arrangements;
3. to confirm that the management system is capable of achieving the organization's policies objectives and evaluation of the ability of the management system to ensure the client organization meets applicable statutory, regulatory and contractual requirements;
4. If applicable, to identify areas for potential improvement of the management system.
5. To confirm that the certified management system(s) conforms with requirements of to the standard, including, but not limited to :
 - a. internal audits and management review,
 - b. a review of actions taken on nonconformities identified during the previous audit,
 - c. treatment of complaints,
 - d. effectiveness of the management system with regard to achieving the certified client's objectives,
 - e. progress of planned activities aimed at continual improvement,
 - f. continuing operational control,
 - g. review of any changes, and
 - h. use of marks and/or any other reference to certification.

Confirming that all objectives were sufficiently met based on the sampling conducted during this audit.

2. Previous Audit Results

The results of the last audit of this system have been reviewed, in particular to assure appropriate correction and corrective action has been implemented to address any nonconformity identified.

No. of nonconformities from previous audit	Major	0	Minor	3
No. of nonconformities closed	Major	0	Minor	3
No. of nonconformities re-raised	Major	0	Minor	0

This review has concluded that:

- any nonconformity identified during previous audits has been corrected and the corrective action continues to be effective.

2.1 Verification of entire previous cycle Bureau Veritas Certification audit reports

The audit confirmed that the management system has effectively adapted to internal and external changes while maintaining its relevance to the certification scope. It also demonstrated a commitment to continual improvement and alignment with the organization's policy and objectives.

3. Basic Inputs and Initial Planning

The organization's business process map has remained unchanged since the previous cycle. All audited areas were confirmed prior to conducting the audit engagement. For further details, please refer to the audit program/audit summary. The organization's location remains the same as indicated in their valid permit, which is consistent with their business address.

4. Key people interviewed / involved

Name	Department/Process
See attached attendance record for more details.	

5. Audit Findings

The audit team conducted a process-based audit focussing on the significant aspects, risks and objectives. The audit method used were interviews, observations of activities and review of documentation and records.

The onsite audit was started with an opening meeting which attended by the senior management of the organization.

The audit findings were communicated to the management of the organization during the closing meeting, final conclusion of the audit results and recommendation by the audit team also briefed to the management during the meeting.

5.1 Manual adequacy

The organization's system manual clearly identifies all interrelated processes and ensures conformity to the standards' requirements. This manual is supported with policies, procedures, work instructions, and other relevant documented information, ensuring consistent implementation of their management system requirements.

5.2 Validation of Scope & Exclusions

As aligned with the active certificate (s):

OCEANWIDE MARITIME SERVICES CORP.	GF Cebu Kang Ha Foundation Bldg. Osmeña Blvd. cor. Lapu-Lapu St. Cebu City 6000, Philippines	Provision of Training, Assessment and Competence Achievement Based on STCW 1978, as Amended and other Training Programs including Design and Marine Survey and Certification
Site 1	General Evangelista St. Brgy Poblacion, Bacoor Cavite	Provision of Training, Assessment, and Competence Achievement based on Training Programs including Design and Marine Survey and Certification

Confirming that the scope statement indicated in this report, internal documentation of the organization and audit plan is consistent with the actual operations audited. Also, the statement clearly indicates the products/services covered in the certification of the company.

No permissible exclusion noted.

Note that 'supply' is incorporated in this organization as they fully manage the provision of services needed for their core and support operations until delivery to their intended clients/customers.

5.3 Level of Integration (in case of Integrated Management System Audit)

QMS: Not Applicable

5.4 Achievement of Policy Commitments and Objectives

Management System Policy

The policy is reviewed during management reviews and reintroduced to all personnel at general meetings. It is prominently displayed in strategic locations throughout the organization and effectively reflects the management's commitments to customer satisfaction, continual improvement, and sustained compliance with all applicable legal requirements. The policy is also aligned with the organization's vision, mission, and strategic direction.

Objectives and Monitoring

Strategic objectives, targets, and action plans have been established with appropriate monitoring and record-keeping in place. The targets set for the previous monitoring period generally yielded favorable results. An extensive data analysis and evaluation process is enforced to ensure the continued relevance of current goals in relation to the organization's pos

5.5 Management system effectiveness

Conformance to the applicable and relevant requirements of the standard was effectively demonstrated across all audit areas based on observations of actual practices, review of objectives and targets, risk management, and operational controls, along with their associated monitoring tools. Improvements were noted in most areas and were included in the Management Review minutes. Resources such as manpower, materials, budget, and infrastructure were all sufficient to support the growing demands of clients/customers and the overall operational requirements of the organization. Suppliers were

adequately controlled and evaluated for their performance in delivering services/goods according to agreed specifications.

Customer satisfaction remains high, and a fair distribution of responsibility and accountability within the organization enables them to thrive under various circumstances. Despite some findings, the organization's Vision, Mission, and Quality Policy remain intact and are reflected in their overall performance outcomes.

Internal Audit

The Internal Audit was completed according to the presented audit schedule, audit reports, and established procedures. Audit findings were effectively captured and monitored. Reviewed reports showed evidence of conformance in each area, while negative findings were also noted where applicable. Auditors were trained and evaluated for their audit performance based on the presented records. Impartiality was maintained as no auditor audited their own area. Previous findings for both internal and external audits were adequately managed.

Management Review

The recent Management Review (MR) meeting was attended by Top Management and key representatives from various functional areas of the organization. The meeting successfully demonstrated the overall effectiveness of the organization's management system(s) in accordance with all applicable requirements. The following inputs/outputs, among others, were satisfactorily captured in the meeting minutes: customer satisfaction including complaints/feedback handling, performance of the management system, risks and opportunities and their relevant issues, resource requirements, internal audit results, initiatives/improvements, and compliance/legal obligations.

Required management review inputs and outputs were adequately covered based on the presented meeting minutes, establishing conformance to clauses 9.3, 10.1, and 10.3 of the standard(s). Overall, the resource requirements are still sufficient to support the operations.

Customer Satisfaction and Complaints Handling

The client conducts an annual customer survey, with recent results showing very satisfactory marks and no complaints or negative feedback from customers.

Despite this, the client maintains a robust process for handling customer complaints/feedback. When a potential issue is received, authorized representatives perform a validation/assessment before forwarding it to the concerned personnel/department for proper response and further handling. Once all involved personnel have made a decision, a written response is sent to the client. The issue is tagged as closed once there is no recurrence seen in the next monitoring period.

References for complaints handling (as applicable) include Incident Reports, Corrective Action Reports, and the Complaints Log.

5.5.1 General

Internet data:

Oceanwide Maritime Services Corp. (OMSC) is a Philippine-based maritime services institution established in 2012 and headquartered in Cebu City, with operations extending to Manila and other areas. The company functions as a one-stop provider of maritime solutions, offering training, surveys, audits, inspections, and certification services designed to ensure compliance with international maritime regulations and domestic laws. It is accredited under the Standards of Training, Certification and Watchkeeping (STCW) and authorized by Philippine government agencies to conduct statutory surveys, audits, and issue relevant certificates on their behalf.

OMSC caters to shipowners and maritime stakeholders by delivering customized, technology-driven services across safety, security, environmental protection, and regulatory compliance. Its capabilities include maritime training programs, marine and MARPOL surveys, security assessments, and consultancy services. Supported by a team of qualified maritime professionals and equipped with advanced simulators, the company aims to provide efficient, high-quality solutions aligned with global maritime industry standards.

5.5.2 Planning

Documentation

The control of documented procedures comprehensively covers requirements for document creation/revision (including superseded documents), deletion (handling obsolete documents), versioning or coding, disposal, and access (for copyholders/distribution). As applicable, guidelines for managing physical and digital copies of documented information were also implemented satisfactorily. These reviewed requirements encompass both internal and external documented information. Master lists of Documents and Records contain pertinent details that ensure the concise summary of a document/form. Effective management of documented information was satisfactorily demonstrated in terms of maintenance and retention.

Context/Interested Parties/Risks including Climate Change Considerations

Strategic issues are reviewed at both departmental and institutional levels through meetings. These issues are translated into risks and opportunities and delegated accordingly. High risks are generally addressed with additional or refined measures to ensure the organization meets its intended outcomes. This information is reviewed during Management Reviews, which also include the requirements of interested parties. Discussions were confirmed to align with the current situation in each audit area.

ExamplesInternal Interested Parties:

Employees: Seek job security, competitive/fair/timely compensation, and a healthy work environment.

Management: Aims for efficient operations, goal alignment, and compliance.

Owners/Shareholders: Expect financial returns, transparency, and sustainable growth.

External Interested Parties:

Customers/Clients: Demand quality products/services, fair pricing

Suppliers/Partners: Require timely payments, clear communication

Regulatory Bodies: Enforce legal compliance and timely submission of reportorial requirements

Legal and other requirements

No notices of violations, penalties, or critical observations were issued to the organization by any regulatory bodies. Effective management of permits and licenses was evident among the samples taken from core and support operations.

Organizational structure, roles, responsibilities & authorities

The organizational chart and job descriptions outline the duties and responsibilities related to the Management Systems. These requirements are typically discussed before contract signing. Relevant marks indicating approval requirements for specific decisions that need execution can also be found among the presented implementation records. Confirming that all auditees have sufficient skillsets against their current roles whether designated, detailed or as per job description.

5.5.3 Implementation & OperationLegal and other requirements

No notices of violations, penalties, or critical observations were issued to the organization by any regulatory bodies. Effective management of permits and licenses was evident among the samples taken from core and support operations.

Service Provision/Core Operations

During the limited sample review, consistent implementation of the process requirements was observed, with careful consideration given to customer and legal requirements. The management demonstrated adequate handling of risks, opportunities, and targets. Additionally, clear review and approval processes, along with robust quality assurance activities were evident throughout the audit.

Regarding purchasing activities, adequacy was found among the sampled purchase orders, supplier information and records, supplier evaluations, and inspection activities for safety gear and uniforms. Effective support operations were demonstrated.

Operational Control

An audit was performed on operational control, where effective implementation was observed. Evidence included comprehensive records of customer requirements, detailed design and development documentation, and thorough purchasing controls. Product identification, traceability, and preservation measures were also well-documented. Where applicable, all necessary tests, checks, and verification

measures were adequately conducted and found to be sufficient before the release of products and services..

Management of Resources

The management of resources was audited, showing effective implementation. Evidence included detailed training records, maintenance logs for infrastructure, and documentation of the working environment's suitability.

Training, Awareness, Competence & Organizational Knowledge

Training, awareness, and competence programs were audited, revealing effective implementation. Evidence included training session records, competency assessments, and documentation of staff understanding of their roles and organizational standards. Each audit confirmed that the required standards were met, supported by comprehensive and detailed evidence.

Succession planning is established for key and strategic positions. An effective transfer of knowledge was observed in all areas affected by attrition. Even without a formal workload turnover process, the organization ensures that employees are re-oriented to their duties and responsibilities before they begin their work.

[Please see audit notes for complete details.](#)

5.5.4 Monitoring and Measurement

Customer Satisfaction/Feedback/Complaint Handling

The client conducts its customer survey on a periodic basis with its recent results showing a very satisfactory mark, and with no complaints, negative feedback received from its customers.

Even that being said, the client still maintains a process for handling their customer complaints/feedback. Once a potential issue is received, the authorized representatives will do a validation/assessment before turning it over to the concerned personnel/department/area for proper response and further handling. Once all involved personnel have made the decision, a response will be forwarded to the client in the form of writing. It will be tagged automatically closed once there's no recurrence seen in the next monitoring period.

Reference for complaints handling (as applicable): Corrective Action Report, Complaints Log / record, etc.

5.5.5 Improvement

Continual Improvement

Continual improvement sources include feedback from customers and employees, performance reviews, benchmarking against industry standards, audits for identifying gaps, ongoing training, technology upgrades, customer satisfaction monitoring, and proactive risk management.

5.6 System strengths

1. Strong performance of instructors and assessors was observed based on 2026 evaluation results, with above-average to exceptional ratings evidencing competence and effectiveness in delivering services, thereby supporting the consistent realization of QMS requirements and customer satisfaction

5.7 Nonconformities

MJM/01:

4.2 Understanding the needs and expectations of interested parties – Compliance

Absence of the following regulatory records was noted

- Actual Business Permit for Year 2026
- NPC's Data Privacy Registration

Justification: Not elevated to a major nonconformity based on the following considerations:

- Application for Permit No. 120483 dated January 20, 2024, with OR No. 3044933 dated April 13, 2026, and OR No. 2971664 dated January 20, 2026
- DPR: Sworn Statement dated March 3, 2021, signed by Head of Agency A.T. Sevilla II and DPO K.B. Paquit
- No immediate impact on the organization's ability to achieve its intended outcomes was identified

MJM/02:

9.1.3 Analysis and Evaluation – Customer Satisfaction: Limited evidence of clear analysis and evaluation of comments and suggestions from the 2025 Customer Satisfaction Survey was observed, resulting in unclear determination of whether certain items should be classified as complaints. The existing complaints procedure (SP-TRC-019-00 Rev. 0, effective March 27, 2026) appears to focus on trainee complaints and may not fully cover other sources such as general customer feedback or other services provided (*Root cause analysis and a system-level approach were not consistently evident, and traceability from issue identification to resolution could not be fully established*).

Samples:

STCW:

- Releasing certificates takes few days –item 5
- Please provide equipment that is in good working condition (MEFA) – item 6
- No coordination between instructor and assessor regarding materials used during demonstration – item 11

MDS:

- Training PPT was confusing and has a lot of errors (CCM) – Item 4

Justification: Not elevated to a major nonconformity based on the following considerations:

- Corrections can be found per item
- Considerations during Management Review
- No immediate impact on the organization's ability to achieve its intended outcomes was identified

Note:

Nonconformities detailed herein shall be addressed through the **organization's** corrective action process, in accordance with the relevant corrective action requirements of the audit standard, in actions to prevent recurrence, and complete records maintained.

Corrective actions to address identified **major** nonconformities shall be carried out immediately. Our auditor will perform a **follow up visit** within 90 days **or 45 days (for ISO 19443)** to confirm the actions taken, evaluate their effectiveness, and determine whether certification can be granted or continued.

Corrective action to address identified minor nonconformities shall be carried out and records maintained with supporting evidence.

The responses to the nonconformities may be either in hard copy or electronically using the NCR herein (preferred) and forwarded to the BV Certification office.

At the next scheduled audit visit, the BV Certification audit team will follow-up on all identified nonconformities to confirm the effectiveness of the corrective actions taken and close out.

5.8 Opportunities for Improvement

Site 1: Bacoar, Cavite

6.1.2 Risk Management: Revisit the risk scoring system. Several controls are already implemented and proven effective; however, corresponding risk levels remain rated as high or medium (e.g., equipment malfunction, instructor availability). Align scoring with actual control effectiveness and residual risk.

7.1.5.2 Measurement Traceability: Strengthen traceability details in calibration reports. While current reports include calibration results and test procedures, additional traceability information should be incorporated.

7.1.3 Maintenance (Facilities/IT): Improve retention and documentation of completed replacement, repair, and troubleshooting activities for support and training equipment to maintain traceability of the completed tasks. Currently, only an inventory monitoring file with a remarks section is maintained.

8.3 Course Development and Review: Strengthen documentation of the basis for course review and development (e.g., client requests). This is essential to clearly demonstrate compliance with client-specific customization requirements. Currently, only approved version of the courses can be retrieved.

7.2 Competence: Revisit the foundation of the training development plan and strengthen its alignment with defined competency requirements and performance evaluation results. Currently, the identification of required trainings for each employee is solely determined by the Training Manager.

Head Office: Cebu

9.1.1 Performance Monitoring: Performance measures are established per department; however, there is an opportunity to refine their measurability and ensure that expected versus actual performance data are clearly defined, consistently monitored, and systematically reported.

Example:

Survey and certification

Target 3: to enhance the surveying confidence of existing surveyors

Measures and target: annual evaluation of all ocean wide surveyors

Remarks: achieve performance evaluation for the surveyors and summarize customer feedback data.

9.2 Internal Audit: A comprehensive IQA was conducted in November 2025; however, there is an opportunity to improve the process:

- Information on conformity statements in audit reports to show evidence of effective system implementation, not only nonconformities
- Audit assignments, especially for internal audit activities, to ensure impartiality
- Root cause analysis to address the real underlying issues

EDL:

- **8.1 HR:** Although interview sheets are available, consider maintaining records of interview outcomes for job applicants, particularly the rationale behind hiring decisions.
- **8.1 HR.** While employee performance is typically evaluated at the end of the probationary period, consider conducting an earlier review to provide timely feedback and support.

5.9 Use of BV and AB logo in printed and virtual media

Use of Certification and Accreditation Marks:

The format, including the size, shape, and placement of the logo, was found to be adequate in the sampled items:

- **Website**
- **Manuals/Procedures**

6. Uncertainty / obstacles that could affect the reliability of audit conclusions

None

7. Unresolved diverging opinions between the audit team & audittee

None

8. Agreed follow-up actions

None

9. Conclusion:

- The management system documentation demonstrated conformity with the requirements of the audit standard and provided sufficient structure to support implementation and maintenance of the management system,
- The organization has demonstrated effective implementation and maintenance / improvement of its management system.
- The organization has demonstrated the establishment and tracking of appropriate key performance objectives and targets and monitored progress towards their achievement,
- The internal audit programme has been fully implemented and demonstrates effectiveness as a tool for maintaining and improving the management system,
- Throughout the audit process, the management system demonstrated overall conformance with the requirements of the audit standard.

10. Recommendation

The audit team conducted a process-based audit focussing on significant aspects/risks and objectives required by the standard(s).

Auditing is based on a sampling process of the available information and the audit methods used were interviews, observations, sampling of activities and review of documentation and records.

The structure of the audit was in accordance with the audit plan and audit planning matrix included in the Appendices to this summary report.

The audit team concludes that the organization has/has not established and maintained its management system in line with the requirements of the standard(s) and demonstrated the ability of the system to achieve requirements for products and/or services within the scope and the organization's policy and objectives.

Therefore the audit team recommends that, based on the results of this audit and the system's demonstrated state of development and maturity, that this management system certification be **Continued**.

This report is confidential and distribution is limited to the audit team, the company and the BV Certification office.

AUDITOR NOTES / SIGNIFICANT AUDIT TRAILS

Opening Meeting: see attendance sheet

Discussion points:

- introduction of the participants, including an outline of their roles.
- confirmation of the scope of certification.
- confirmation of the audit plan (including type and scope of audit, objectives and criteria), any changes, and other relevant arrangements with the client, such as the date and time for the closing meeting, interim meetings between the audit team and the client's management.
- confirmation that the audit team leader and audit team representing the certification body is responsible for the audit and shall be in control of executing the audit plan including audit activities and audit trails.
- confirmation that, during the audit, the client will be kept informed of audit progress and any concerns.
- confirmation of the availability, roles and identities of any guides and observers.
- confirmation of formal communication channels between the audit team and the client.
- confirmation of the language to be used during the audit.
- confirmation that the resources and facilities needed by the audit team are available.
- confirmation of relevant work safety, emergency and security procedures for the audit team.
- information about the conditions under which the audit may be prematurely terminated.
- the method of reporting, including any grading of audit findings.
- confirmation of matters relating to confidentiality.
- confirmation of the status of findings of the previous review or audit, if applicable.
- methods and procedures to be used to conduct the audit based on sampling.
- opportunity for the client to ask questions.
- appeals/feedback complaints procedure

Auditor: Michael Jordel Matundan

Auditee: Jaime Dungo (Training Manager), Katrina Riego (Purchasing/ HR)

Date: 7 May 2026

Process / Activity: Site Management (As applicable: Context, Risk, Permit, Objectives, Roles, Customer Satisfaction, Documented Information, Internal Audit Results, etc.)

Notes:

COTO:

- No delays
- Training Porgams – Enclosed Space and Entry (effective 2025)
- Facilities – no equipment breakdown / electricity issue – reported
- No. of clients – 4
- Enrolment rate – increasing number
- Issue: late arrival of trainees
- No. of instructors: 2
- No. assessor: 1
- In-demand program: NSEC
- Least: Gas Measurement
- Upcomig client – 3 (expected)
- LGU – no issues
- Customer satisfaction (conducted quarterly) – Exceptional results

Issue/ Interested Party/ Risk/ Opportunity**Relevant interested party record (ISO-MNL-002-01 rev 0 eff 14 Jan. 26)**

Trainees – high quality up to date training, cert., practical experience

Risk: inadequate/limited training

Control: regular review of training programs

Regulatory bodies – compliance

Risk: regular NC, suspension

Control: monitor applicable advisories, circulars, etc.

Risk Assessment + Treatment Plan

ISO-MNL-004-00 (25 March 26 evaluation)

Issue: unsafe practical training area / equipment malfunction

Risk: safety hazards

Action: safety audits, maintenance and repair, proper signage

Eval: implemented and effective – inspection report

Issue: unavailability of qualified instructors

Risk: lack of certified and experienced instructors

Actions: develop a recruitment strategy, back up instructor, professional devt

Evaluation: implemented and effective – 201 files, evaluation

Issue: weather conditions

Risk: safety risk, training delays

Control: monitoring of weather / contingency plans

Facilities:

Context + Climate Action (Risk and Opportunity, Interested Party, Scope, Permits and Licenses), Leadership (Policy, Roles), Planning (Risk, Objectives, Changes), Customer Satisfaction and Feedback / Management Review, & Use of BV Logo, etc.)

Notes:

Operations:

Training: decrease in training enrollees (due to earthquake and typhoons)

- Client: domestic training
- STCW – decrease (students are located remotely)
- Online training – enhanced
- OTS training – affected
- New courses: none in 2025
- Revised courses in 2025: OTS training courses, STCW courses
- All accreditations are active
- Practical – Simulators
- No safety training

Marine Survey and Certification – increased (for vessel requirements)

Accredited by coastguard

Infrastructure – no changes

Personnel – no change in Top Management, Operations – new registrar

Resource availability – enough supplies and inventory of equipment

Leasing – no issue with the owner

Customer satisfaction: VS in general

Complaints: Snack, parking area, coffee – none relevant to instruction and marine survey and certification

Regulatory – no issues

Improvement plans:

- Training expansion – cyber security, IMDG, etc.
- Marine Survey and Certification – maintain / Look for more private ports

Financials:

- Training – below target
- Marine SC incl. consultation – above target

Context of the Organization

SWOT Analysis reviewed during MR (annual) and Strategic Planning (every 3y)

Reviewed last MR:

- Financial stability
- Not updated equipment
- Insufficient pooling of instructors and assessors
- No separate meter for utilities
- Make our competitors our partners
- Technological advancements
- Dependency of regulations

Verified strategic pplan
